SUMMARY

Junior full-stack developer with an Advanced Diploma in Information Technology and two years of hands-on project work in React, TypeScript and Next.js. Built and deployed Digi-Express, a full-stack store with PostgreSQL, authentication, Stripe payments and an admin dashboard. A background in IT support and network administration taught me to troubleshoot methodically and explain technical problems clearly. Looking for a junior developer role where I can ship features and keep learning.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SQL
Frontend: React, Next.js (App Router), Tailwind CSS, TanStack Query, shadcn/ui, responsive design
Backend & data: Next.js server actions and route handlers, REST APIs, PostgreSQL, Prisma, Better Auth, Stripe, Zod
Tools: Git and GitHub, Vercel, Vitest, ESLint, VS Code, AI-assisted development

PROJECTS

Digi-Express — Full-stack e-commerce store Live · Code Jul – Oct 2026
Next.js, TypeScript, PostgreSQL, Prisma, Stripe, Better Auth

- Built a complete online store on my own: catalogue with filters, cart, Stripe checkout, order history, and an admin dashboard for products, orders and customers.
- Added sign-up with email verification and Google/GitHub sign-in using Better Auth; every admin server action checks the user's role on the server.
- Made checkout tamper-proof: totals are recalculated on the server from database prices, and orders are created only by Stripe's signed webhook.
- Rewrote product search in PostgreSQL to handle plurals, typos and filler words, and wrote Vitest unit tests for the checkout totals.

Weather App — Map-based weather dashboard Live · Code Mar 2026
React, TypeScript, TanStack Query, Zod, Leaflet

- Click anywhere on the map or search for a city to see current weather, 48-hour and 8-day forecasts, air quality and weather map layers.
- Validated API responses with Zod and cached them with TanStack Query; moved forecasts to the keyless Open-Meteo API to cut paid API calls.

Personal Portfolio — Portfolio and case studies Live 2026
Next.js, TypeScript, Tailwind CSS

- Statically generated site with a case-study page per project, SEO metadata, social preview images and a working contact form.

EXPERIENCE

Network Administrator Feb 2020 – Apr 2020
Savvy Bracket — Loakan Road, Baguio City

- Maintained the office network and devices, and carried out routine system and network maintenance.
- Diagnosed and fixed connectivity and configuration issues, and helped staff with computer and network problems.

Technical Administrative Assistant (Job Order) Aug 2019 – Jan 2020
Department of Education (DepEd) Regional Office — Wangal, La Trinidad

- Provided technical support for staff computers and everyday IT issues in a government office.
- Handled data entry, documentation and records with close attention to detail.

EDUCATION

Advanced Diploma in Information Technology 2016 – 2018
Informatics Institution — Baguio City

- OJT project: built an events calendar for posting events, notices and feedback by customizing a jQuery calendar plugin. Code
- Student project: designed and built a multi-page clothing store website in HTML and CSS. Code

Secondary Education 2010 – 2015
Baguio City National High School — Baguio City
